

DOCTOR UMERKHAN JUNAIDKHAN

Kalyan, Maharashtra, India | (+91) 9820098685 | umerkhandoctor04@email.com | [linkedin.com/in/umerkhan04](https://www.linkedin.com/in/umerkhan04) | github.com/uk0976
| Portfolio: <https://umerkhan-portfolio.onrender.com>

PROFESSIONAL SUMMARY

Aspiring AI & Data Science professional with hands-on experience in developing machine learning, NLP, computer vision, and automation-based projects. Skilled in Python, SQL, Prompt Engineering, AI tools, and data analysis, with practical exposure through academic projects and a Python Development internship. Seeking an entry-level role to apply technical expertise, contribute to impactful solutions, and grow within a technology-driven organization. Passionate about leveraging emerging technologies to solve real-world problems while continuously learning and contributing to innovative teams.

TECHNICAL SKILLS

- **Languages:** Python, SQL, Java, JavaScript, HTML, CSS, C (Basic)
- **Frameworks & Libraries:** OpenCV, Streamlit, LangChain, FAISS, Hugging Face Transformers (BioBERT), Tkinter, Pandas, NumPy, Matplotlib, Scikit-learn, NLP Libraries, Tesseract OCR, PyPDF2, PyMuPDF
- **Databases & Cloud:** MySQL, SQL Workbench, Google Colab, Groq (Llama-3), Sarvam AI
- **Tools & Developer Methodologies:** Visual Studio Code, Jupyter Notebook, SQL Workbench, Git, GitHub, Prompt Engineering, Data Analysis, Data Visualization, Machine Learning, Problem Solving, Debugging, Agile Development, Version Control.
- **Productivity & Office Tools:** Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Microsoft Office Suite, Google Docs, Google Sheets, Google Slides.

PROFESSIONAL EXPERIENCE

Python Developer Intern | IRABOT TechEd LLP – Navi Mumbai, Maharashtra | June 2023 – July 2023

- Developed and tested Python-based applications, gaining hands-on experience in software development and debugging practices.
- Collaborated with mentors and team members to implement AI-driven solutions and optimize application functionality.
- Applied programming concepts and problem-solving techniques to real-world development tasks during a 6-week industry internship.
- Strengthened practical knowledge of Python, software development methodologies, and project lifecycle management in a professional environment.

PROJECT EXPERIENCE

AI & Software Development Projects | 2024 – Present

- Developed AI, Machine Learning, NLP, and Data Analytics applications, including face recognition, task scheduling, stock prediction, and medical report summarization systems.
- Led the end-to-end development of multiple projects, handling frontend development, backend implementation, database integration, and AI model deployment.
- Leveraged Python, SQL, OpenCV, LangChain, FAISS, Generative AI, and Prompt Engineering techniques to build practical, user-centric solutions.
- Leveraged various AI tools, Large Language Models (LLMs), and AI frameworks to design and develop innovative real-world solutions.

TECHNICAL PROJECTS

Multiple Face Recognition Attendance System | Lead Developer | Python, OpenCV, Haar Cascade, LBPH Algorithm, SQL

- Designed and developed an automated attendance management system capable of detecting and recognizing multiple faces in real time using computer vision techniques.
- Implemented Haar Cascade and LBPH algorithms to achieve accurate facial recognition and streamline attendance tracking with database integration.
- Improved attendance recording efficiency by eliminating manual processes and ensuring reliable identity verification.

Smart Task Scheduler with AI Integration | Lead Developer | Python, NLP, Machine Learning

- Developed an AI-powered task scheduling platform that processes natural language inputs to extract tasks and automatically assign priorities.
- Implemented NLP and machine learning techniques to organize daily activities, optimize scheduling, and enhance productivity.
- Designed an intelligent workflow system that helps users manage tasks efficiently through automated prioritization and planning.

Stock Prediction System with Integrated Chatbot | Lead Developer | Python, Machine Learning, Data Analysis

- Built a predictive analytics system that analyzes historical stock market data to generate forecasts using machine learning models.
- Integrated an interactive chatbot interface to provide users with market insights, trend analysis, and prediction-related information.
- Developed data processing and visualization pipelines to support informed decision-making and improve user engagement.

MedInsight - AI Medical Report Summarizer | Core Developer | Python, Streamlit, LangChain, FAISS, BioBERT, Groq (Llama-3)

- Developed a multilingual AI-powered platform that summarizes complex medical reports into role-specific insights for doctors, patients, and healthcare workers.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline with BioBERT-based clinical entity extraction to improve summary relevance and accuracy.
- Integrated voice readout and conversational AI features to enhance accessibility and enable interactive follow-up queries.

EDUCATION

Bachelor of Engineering (B.E.) in Artificial Intelligence & Data Science | Terna Engineering College, Navi Mumbai, Maharashtra | Expected Graduation: 2027

Relevant Coursework: Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Database Management Systems, Computer Vision, Natural Language Processing, Data Analysis, Object-Oriented Programming.

Diploma in Artificial Intelligence & Machine Learning | A. R. Kalsekar Polytechnic, Navi Mumbai, Maharashtra | 2021 – 2024 | 90.33%

Relevant Coursework: Python Programming, Machine Learning, Data Analytics, SQL, Software Development, AI Applications.

CERTIFICATIONS & ACHIEVEMENTS

Certifications

- Google Gen AI Exchange Program – Completed training on Generative AI fundamentals, prompt engineering, and real-world AI applications.
- Google Arcade Program (Google Cloud Skills Boost) – Participated in Google's cloud learning initiative.
- Blockchain Technology Workshop – Completed hands-on training on blockchain fundamentals at Terna Engineering College.

Achievements

- Published research paper titled "*Multiple Face Recognition Attendance System*" in the International Journal of Research and Analytical Reviews (IJRAR) (2024).
- Secured 3rd Prize in Technical Paper Presentation at F. R. Agnel College, Vashi.
- Awarded Best Student Award (Twice) for outstanding academic performance.
- Received Best Orator Award for excellence in communication and presentation skills.
- Achieved 90.33% overall in Diploma in Artificial Intelligence & Machine Learning.
